

# Segment Execution Policy

Objective

**Aker Solutions shall efficiently and effectively deliver projects, services, technologies and products of right quality and value to our customers**

Commitment

- We shall always focus on HSSE and process safety and strive to execute our projects with zero harm to people, environment and assets
- We shall understand customer needs and requirements and continuously improve to increase customer value and our competitive advantage
- We shall execute all projects and services in accordance with Aker Solutions' Management System and scope specific Execution Models, ensuring predictable delivery on requirements, time, scope and cost
- We shall analyze and understand risks and opportunities and ensure that these are adequately mitigated/realized throughout the execution phases
- We shall actively utilize our workshare capabilities to secure multisite resource optimization enabled by standardized working methods
- We shall provide the right level of resources to ensure that this policy is implemented appropriately

Behavior

- All segments collaborate, build with alliance partners to maximize value for our customers
- We continuously assess and manage risks that impact our ability to meet our customers' needs and expectations
- We openly communicate and visualize performance, learnings and challenges, seeking the most efficient solutions and learn from our experiences
- We work actively to simplify, standardize and continuously improve our deliverables in collaboration with our customers
